

Phase Shift Keying (PSK) Modulation & Demodulation

Product Code :GKE430

Objective:

- To study the PSK Modulation & Demodulation
- On-board Carrier Generator

Technical Specifications:

- To study the PSK Modulation & Demodulation
- On-board 02 nos. Of Carrier Generator: Amplitude - 4V Frequency Range :268KHz to329KHz
- On-board Modulating Function (Signal) Generator with variable amplitude & frequency
- On-board PSK Modulator & Demodulator
- On-board potentiometer for varying depth/percent of modulation
- DC Supply: Built in IC regulated power supplies
