

## Pulse Generator 0.1 Hz-1 MHz (GE 523)

Product Code: GE 523

The Pulse Generator is a multipurpose Pulse Source with different type of Pulse outputs developed across a 50/600 ohms internal impedance and have variable amplitude control. It is a versatile & reliable low cost pulse generator. This compact instrument features an uncomplicated design using high quality standard components to ensure ion dependable service.

### FEATURES

- Frequency Range: 1 Hz to 1 MHz.
- Output: 6 types of Pulse wave Form by rotary selection.
- \* Separate Trig output.
- Up to 60 dB attenuation (40dB coarse and 20dB fine)
- \* Output impedance 50 ohm sand 600 ohms
